## SUMMARY

An undergraduate student in the Department of Computer Science Engineering. Ever since I was a child I had an instinctive urge for expansion and growth. The discipline of gratitude is the explicit effort to acknowledge and it has given me a gift of love and joy. My mission in life is not merely to survive, but to thrive and to do with some passion, some compassion, some humor and some style. Your present circumstances don't determine where you can go they merely determine where you start.
